
"The artistic potential of Kyiv for Preschoolers"

On October 19, 2019, the fourth-year students of the specialty "Preschool Education" in the framework of studying "Methods of Introducing Children to Art" visited Bohdan and Varvara Khanenko National Museum of Arts, where they had the opportunity to review extremely valuable and unique art exhibits.

The practical lesson aimed at preparing students to a self-study task in the form of a pedagogical essay on the topic "Creative Potential of Kyiv for Preschoolers", as well as the development of a creative mini-project for preschool children.

The amazing atmosphere, sophistication, and contemplation of antiquity and uniqueness left students with positive emotions, developed a positive attitude to the Museum as a cultural, educational and aesthetic institution and contributed to the formation of students' professional competencies.
