
Career guidance meeting with University College students

On February 20, 2020, representatives of the teaching staff and student groups of the Pedagogical Institute met with students of the final year of the Preschool Education program of the University College.

Both teachers and students took part in the discussion about the expediency of continuing education of college graduates on educational programs of the Pedagogical Institute. One of the graduates of the University College in 2018, and now a student of the Pedagogical Institute, Kateryna Sekach, told about the features of the educational process at the Pedagogical Institute. Members of the Student Council of the Pedagogical Institute told about the life of Pedagogical Institute students, their leisure time, scientific and volunteer activities.

The traditional introduction to this event was made by employees of the Center of Information, Advertising and Career Guidance of the Grinchenko University (head of the Department - T. O. Datsenko), who spoke about the University's activities both in Ukraine and internationally.

We hope that soon graduates of the University College will become part of the student community of the Pedagogical Institute. After all, you should not go anywhere, because we have the BEST option waiting for YOU!
