

Scientific Fiesta of Future Teachers

On May 21, 2021, within the Science Festival, the University hosted the event "Scientific Fiesta of Future Teachers", organized by the teaching staff of the Department of Pedagogy and Psychology of the Pedagogical Institute.

Active participants of the event were first- and fourth-year students of specialties 013 "Primary Education" and 012 "Preschool Education" of the first (Bachelor's) educational level.

During the event, fourth-year students presented the results of their scientific research on the implementation of the main problems of the formation of a New Ukrainian School. Each speaker demonstrated their own professional readiness to carry out research activities in order to update the forms, methods and means of comprehensive development of primary school students. The presented author's information resources received a significant emotional response and interest from the participants of the Scientific Fiesta.

The event was held in a professional and friendly atmosphere, and the interaction between graduate students and first-year students was extremely useful.

We are grateful to all participants and their supervisors for their participation, and we wish them further success!

***Moderators:** Ivanyuk Hanna, Doctor of Pedagogical Sciences, Professor, Head of the Department of Pedagogy and Psychology of the Pedagogical Institute; Muzyka Olena, Candidate of Psychological Sciences, Associate Professor, Associate Professor of the Department of Pedagogy and Psychology of the Pedagogical Institute*
